

MADA STANDARD PLASTER

Product Description

Mada Standard Plaster is gypsum molding powder product for interiors. The powder product will be mixed with water according to specifications.

Field of Application

Mada Standard Plaster is a molding powder product for interiors use only. It is designed for molding of decorations, cornices, repair works and for modeling.

Manufacturing Standards

Mada Standard Plaster is produced under a quality system independently audited and certified as conforming to ISO 9001:2010

Advantages

- Easy & fast application
- Low consumption
- Versatility of usage

product Characteristics

- Environmental & Healthy:
- Simple mixing and application process
- Usage on all conventional surface
- Create a smooth surface
- Are an appropriate basis under different surface treatment (paint, wallpaper, tiles etc.).

Material Storage &

Handling Conditions

- Mada Standard Plaster should be protected from continuous exposure to moisture. Prolonged or repeated exposure to moisture may cause a loss of strength. If storing on the concrete floor, wooden pallets have to be used.
- Mada Standard Plaster can be mixed by hand or mechanically. Before mixing please ensure that the

mixing equipment and bucket being used are clean. Contamination from previous mixes adversely affect the setting time and strength.

- Add Mada Standard Plaster to the water and mix using hand or electric mixture. Allow the mixture to settle for 3-5 mins. Check the consistency of the mixture and if the mixture is too thick then add slightly more water, conversely if the mixture is too liquid then add slightly more Plaster. Mix Again and if necessary repeat the process until the desired viscosity of the mixture is achieved for optimum application.

Material Packing Details

Weight	Bags Per Pallet
25 Kg	50
40 Kg	33

Technical Specification

Parameters	
Color	White / Off White
Mixing Ratio with Water	20 L of water per 25 Kg bag 32 L of water per 40 Kg bag
Workability	5 mins approx.
Final Set Time	21 mins approx.
